Git · Docker · Vite · GA4 · GTM · SSG/ISR · CI/CD · Agile

EDUCATION

BSc (Hons) Information Technology
Computer Networking & Security
Sunway University, Selangor
2018 – 2021

PROFILE

Frontend developer with 5+ years building responsive, accessible web applications across automotive, banking, consulting, and digital entertainment. Currently at Pixent owning frontend delivery for a customer-facing consumer platform, with a track record shipping enterprise products at Deloitte for Maybank. Comfortable owning the full frontend lifecycle from POC to production — and the workflow around it: analytics, performance, and CI.

EXPERIENCE

Frontend Developer
Dec 2025 – Present

Pixent Technologies · Kuala Lumpur

- Own frontend delivery across 4 applications — 2 consumer platforms, a partner portal, and a CMS — as 1 of 5 developers under a team lead
- Built the KYC verification module end to end, gating account features and fund movement behind a verified bank identity
- Modelled the journey as a resumable 8-screen flow — verification status checked at the profile level, conditional mobile registration with OTP, bank detail submission, admin review, and a final amount challenge
- Building mini player and picture-in-picture playback for a new platform release, keeping sessions alive while users browse the catalogue
- Partnered with the product designer to define a shared design system, then enforced it in code as a single token set for colour, buttons, and alerts
- Introduced the first analytics coverage on a platform that had none, scoping and implementing GA4 through GTM at the CTO's request
- Introduced a pre-push hook enforcing lint compliance locally, so issues are resolved before they ever reach the remote branch or CI
- Delivered the partner dashboard for referral tracking and performance reporting

Senior Technology Analyst
Apr 2024 – Nov 2025

Deloitte Consulting SEA · Maybank M2E

- Develop enterprise banking web application using React, Tailwind, Zustand
- Create responsive and user-friendly interfaces for banking products such as Deposits and Loans
- Integrate RESTful APIs to fetch and display real-time banking data
- Create multi-step forms for customers to accept terms and conditions
- Fix 7 tickets in 2 days without prior knowledge of the codebase

Frontend Developer
Nov 2022 – Mar 2024

Edag Holding · Shah Alam

- Conceptualized and initiated the development of a resource planning app for project managers
- Designed and developed a proof of concept (POC) to validate feasibility and functionality
- Resolved 82 merge conflicts across 7 branches using Git knowledge
- Wrote Jest unit tests with 80% code coverage to catch bugs early
- Shared frontend knowledge with colleagues from Malaysia and Germany, including code quality

Frontend Developer
Sep 2021 – Oct 2022

OmniGeo Solutions · Kepong

Developed admin system using Next.js and Bootstrap · Created custom functions for uploading, processing, and error handling of CSV files · Implemented user authentication using OAuth with NextAuth

Shopify Frontend Developer · Internship
Dec 2020 – Mar 2021

Jumpstart Commerce · Kuala Lumpur

Developed custom Shopify themes using HTML, CSS, and JavaScript · Launched 3 new Shopify stores and updated 6 existing ones

Frontend Developer · Part-time
May 2020 – Jul 2021

Leo Code · Kuala Lumpur

Create webpages with Angular and Bootstrap · Translate website content to other languages with i18n
